ProSpeed™/MC system is the productivity and quality leader for small space applications

A system approach

At last there is a system approach to applying floor finish in small spaces that combines packaging, applicator and the best finishes on the market. It is extremely easy to master. ProSpeed system helps novice employees quickly become floor finish experts, and is available in a variety of finishes.

No waste, no spills

The average conventional mop head holds 1/3 gallon of finish, and 1/4 gallon is left in the bucket. The ProSpeed system mop head holds 4–6 ounces. Application flow is uniform and consistent. Since the finish is self-contained at all times, the chance of spills is reduced significantly.

Time saver

ProSpeed system applies finish **3X faster** than mop & bucket, and significantly reduces set-up time because everything comes ready-to-use. Simply hook up the components and begin applying finish. No pouring. No bucket. No mess. Everything that touches the finish is disposable, so when you're done clean-up is fast and easy.

The right tool regardless of space

Whether used separately or together, ProSpeed™/MC and TrailBlazer™/MC deliver:

- Faster application
- Less user fatigue
- Less chemical and water waste
- Better results

Time/motion and physiological studies prove that ProSpeed™/MC and TrailBlazer™/MC systems deliver unmatched productivity with less effort

Why are they important?

Time/motion and EMG (Electromyography) studies are the best way to directly measure the muscular effort required. EMG studies are used to measure muscular exertion in real time while performing a task.

ProSpeed system uses...

- 35% less shoulder effort
- 23% less upper back effort
- 40% less lower back effort
- ...than a mop and bucket

TrailBlazer system uses...

- 51% less shoulder effort
- 52% less upper back effort
- 70% less lower back effort
- ...than a mop and bucket

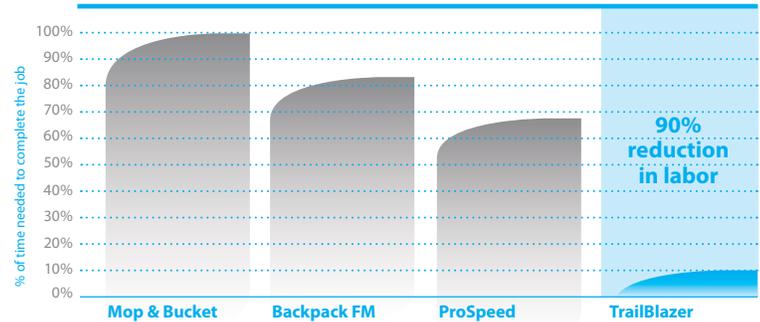

ProSpeed system uses...

- 54% less shoulder effort
- 40% less upper back effort
- 49% less lower back effort
- ...than a flat mop

TrailBlazer system uses...

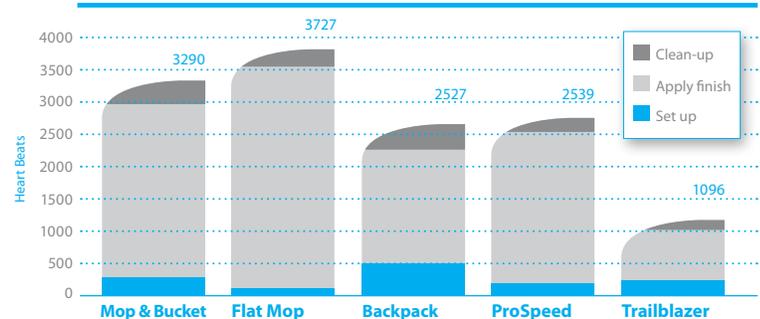

- 65% less shoulder effort
- 62% less upper back effort
- 76% less lower back effort
- ...than a flat mop

Increased Productivity

Less Effort—Total Heart Beats = Total Effort*

Physiological Impact Study

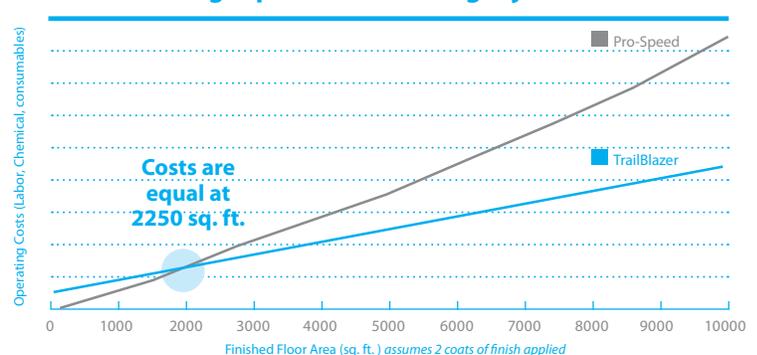

Both systems greatly reduce waste†

| (Measured in Gallons) | Mop & Bucket | Backpack FM | TrailBlazer | ProSpeed |
|-----------------------|--------------|-------------|-------------|----------|
| Chemical Waste | 17.4 | 8.4 | 3.24 | 0.9 |
| Water Waste | 142.5 | 102.0 | 69.6 | 0.0 |

* Disposable pad used with ProSpeed and launderable pad used with TrailBlazer

Choose the right product for the right job

- 25,000 sq. ft. facility
- 2,500 sq. ft. per application with 3 coats or finish
- 3 coats cycles per year
- *2,500 sq. ft.

TrailBlazer™/MC system is the productivity and quality leader for large space applications

Increase productivity

TrailBlazer system applies finish 9X faster than mop & bucket, over 20,000 sq. ft./hour! Set-up and clean-up times are minimal, so TrailBlazer™ system allows you to spend time on the job, not prep and clean-up. Anyone can apply a perfect coat of finish as fast as they can walk.

Decrease chemical waste and odor

TrailBlazer system significantly reduces the amount of finish and water that is wasted by applying the finish directly to the floor from any of Diversey's 5 gallon BIBs. So you never need to fill a bucket again, which means no more odor from open buckets and no buckets to rinse when the job is complete.

Increase quality

TrailBlazer system is easy to use and delivers consistent high-quality results—all with minimal training for personnel. With the specialized pump, the thickness of application remains constant regardless of the walking speed, giving you a flawless finish everytime.

Big Job or Small Job — It's Now an Easy, Time-Saving, Economical Job

ProSpeed™/MC system

- ▶ Up to 3X faster than mop & bucket
- ▶ Covers at a rate of 130 sq. ft. per minute
- ▶ Ideal for small areas — 2,000 sq. ft. or less
- ▶ Minimal set-up and clean-up time
- ▶ Greatly reduces finish waste
- ▶ Dramatically reduces physiological impact on user
- ▶ Consistent, high-quality results
- ▶ Works with a variety of Diversey finishes
